INSTRUCTIONS: Please use this annual report form if you are a member of the Indiana Environmental Stewardship Program (ESP). Your annual performance report should be reviewed and signed by a senior manager at your facility prior to submittal. Once signed, FAX, mail, or e-mail the report to IDEM. If you have any questions, please contact the ESP program manager at 1-800-988-7901.

The Indiana ESP annual performance report should demonstrate progress toward objectives and targets AND certify ESP requirements continue to be achieved. Your annual performance report should cover the previous twelve (12) month calendar year and include the status of projects committed to in your facility's original ESP application, results of completed projects, and assurance that an annual internal environmental management system audit was conducted by your facility. Indiana ESP facilities must submit this annual performance report by April 1st of every year, for each calendar year in which the entity has been a member for at least three (3) full months.

Please do not include any confidential business information in your annual performance report. Public access laws require IDEM to make the Annual Performance Report publicly available, which may include posting all portions of your report on the Indiana ESP Web site.

SECTION D

ENVIRONMENTAL IMPROVEMENT INITIATIVES

Why do we need this information?
Facilities need to show they are committed to improving their environmental performance

What do you need to do?

Identify your facility's next environmental improvement initiative. Refer to the Environmental Performance Table and answer the following guestions.

	oving their environmental performance. Environmental Performance Table and answer the following questions.
1a.	
1D.	What indicator have you selected from the Environmental Performance Table? Non-hazardous waste generation (Total)
1c.	All measurements should represent the performance level for the indicator across the entire facility. For many indicators, you may choose to focus your initiative on a specific subset of the indicator (e.g., a specific material, process, VOC, group of toxic air emissions, or particular waste component). Does your initiative include everything covered by the indicator (e.g., all VOCs, all non-hazardous waste), or a specific process, substance, or component (e.g., ethane, cardboard)? All
	Specific Specific
	If your initiative is specific to a substance or component, please provide additional detail on your indicator (e.g., specific chemical to be reduced, specific waste component).
1d.	What activities or process changes do you plan to undertake at your facility to accomplish your initiative (e.g., technology changes in a particular process line, employee training)? Improve waste management methods, increase Associate training and improved recycling methods.
2.	Does this initiative address a significant aspect in your EMS? Yes
	No—please explain why you believe this indicator should be included as an environmental improvement initiative:
3.	Are you subject to Federal, State, tribal, or local regulatory requirements for this indicator?
	Yes—please explain how your initiative exceeds regulatory requirements:
turi	No pp! If the category listed in Question 1a is Energy Use, Waste, or Air Emissions for Total Greenhouse Gases, please skip Questions 4a – 4b below and in to Appendix 1 to complete the questions pertaining to the category you listed in Question 1a. After completing the respective table in Appendix 1, return this section and complete questions 5 and 6. Otherwise, continue answering questions 4-6 below.
43.	What units are you using to quantify this indicator?
4b.	List the baseline annual quantity of the indicator and the annual quantity you are committing to achieve by the future year. Baseline quantity Year
	Future year quantity (not including production) Year
5.	Does the quantity presented in the future quantity column represent an absolute goal or a normalized goal?
	Normalized goal (i.e., indexed to level of business in baseline year)
	Absolute goal (i.e., demonstrates improvement even if production increases)
6.	Whether your goal is absolute or normalized, you need to provide normalizing factors and normalized quantities in your annual performance reports. Please briefly describe your basis for normalizing. Examples of potential normalizing basis include: gallons of paint produced, square feet of circuit boards sold, number of patients seen, dollars of sales adjusted for inflation, or number of employees (for R&D and administrative sites only). Pound per unit built
